

## Writing Linear Equations

Write the slope-intercept form of the equation of each line.

$$1) \ 3x - 2y = -16$$

$$2) \ 13x - 11y = -12$$

$$3) \ 9x - 7y = -7$$

$$4) \ x - 3y = 6$$

$$5) \ 6x + 5y = -15$$

$$6) \ 4x - y = 1$$

$$7) \ 11x - 4y = 32$$

$$8) \ 11x - 8y = -48$$
