

Multiple Transformations

When reflecting over a line, draw the line of reflection on your graph. Use a different colored pencil for each new transformation. It makes visualizing the transformations easier.

Does the order in which we do a sequence of transformations matter?

Translate $\triangle WMS$ if $W(-5, -1)$, $M(-3, -2)$, $S(-3, 2)$ by the rule $(x, y) \rightarrow (x + 3, y + 2)$, then reflect the image over the y -axis

$$W'(\underline{\hspace{1cm}}, \underline{\hspace{1cm}})$$

$$M'(\underline{\hspace{1cm}}, \underline{\hspace{1cm}})$$

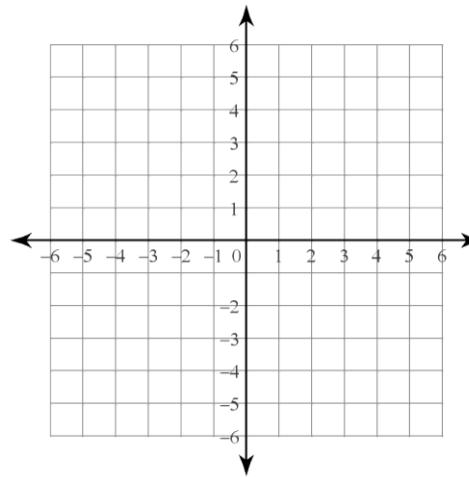

$$S'(\underline{\hspace{1cm}}, \underline{\hspace{1cm}})$$

$$W''(\underline{\hspace{1cm}}, \underline{\hspace{1cm}})$$

$$M''(\underline{\hspace{1cm}}, \underline{\hspace{1cm}})$$

$$S''(\underline{\hspace{1cm}}, \underline{\hspace{1cm}})$$

Reflect $\triangle WMS$ if $W(-5, -1)$, $M(-3, -2)$, $S(-3, 2)$ over the y -axis, then translate the image by the rule $(x, y) \rightarrow (x + 3, y + 2)$,

$$W'(\underline{\hspace{1cm}}, \underline{\hspace{1cm}})$$

$$M'(\underline{\hspace{1cm}}, \underline{\hspace{1cm}})$$

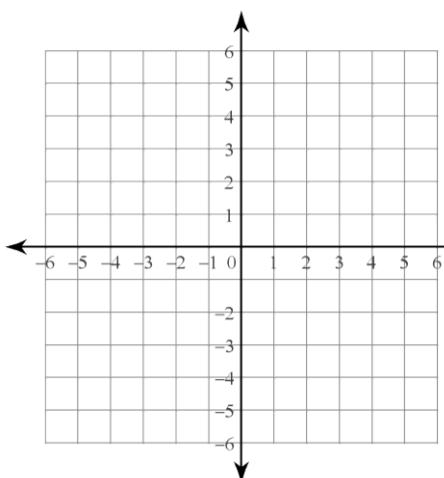

$$S'(\underline{\hspace{1cm}}, \underline{\hspace{1cm}})$$

$$W''(\underline{\hspace{1cm}}, \underline{\hspace{1cm}})$$

$$M''(\underline{\hspace{1cm}}, \underline{\hspace{1cm}})$$

$$S''(\underline{\hspace{1cm}}, \underline{\hspace{1cm}})$$

Rotate $\triangle RAI$ if $R(2, 3)$, $A(1, 1)$, $I(4, -3)$ 90° clockwise about the origin, then reflect the image over the x -axis.

$$R'(\underline{\hspace{1cm}}, \underline{\hspace{1cm}})$$

$$A'(\underline{\hspace{1cm}}, \underline{\hspace{1cm}})$$

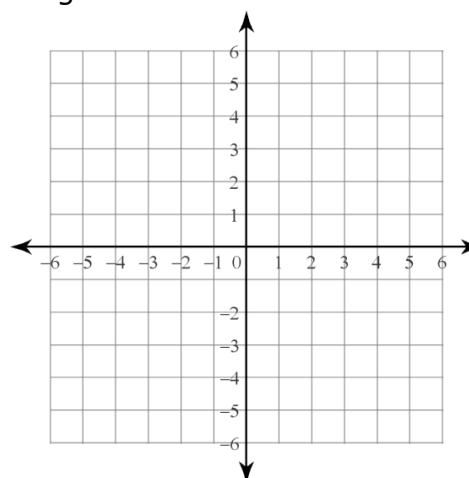

$$I'(\underline{\hspace{1cm}}, \underline{\hspace{1cm}})$$

$$R''(\underline{\hspace{1cm}}, \underline{\hspace{1cm}})$$

$$A''(\underline{\hspace{1cm}}, \underline{\hspace{1cm}})$$

$$I''(\underline{\hspace{1cm}}, \underline{\hspace{1cm}})$$

Reflect $\triangle RAI$ if $R(2, 3)$, $A(1, 1)$, $I(4, -3)$ over the x -axis, then rotate the image 90° clockwise about the origin.

$$R'(\underline{\hspace{1cm}}, \underline{\hspace{1cm}})$$

$$A'(\underline{\hspace{1cm}}, \underline{\hspace{1cm}})$$

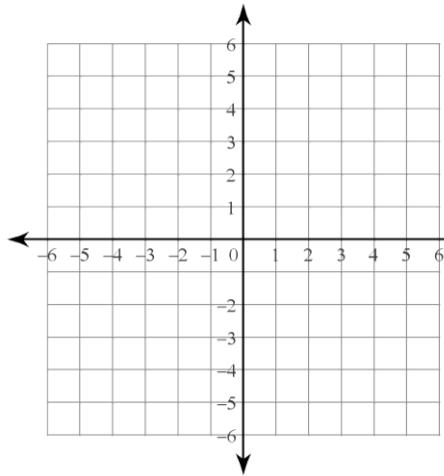

$$I'(\underline{\hspace{1cm}}, \underline{\hspace{1cm}})$$

$$R''(\underline{\hspace{1cm}}, \underline{\hspace{1cm}})$$

$$A''(\underline{\hspace{1cm}}, \underline{\hspace{1cm}})$$

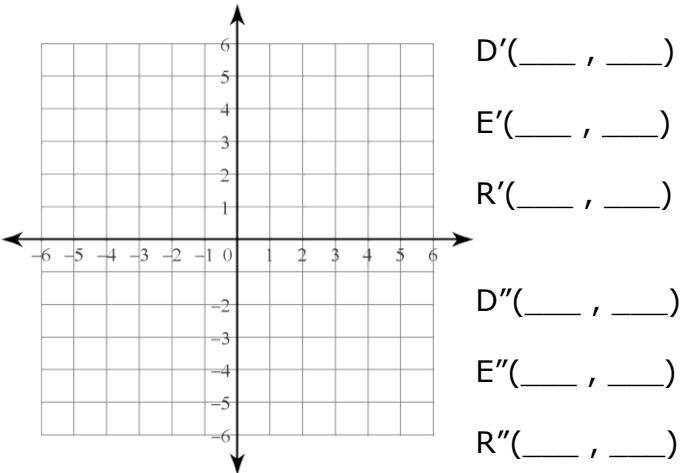

$$I''(\underline{\hspace{1cm}}, \underline{\hspace{1cm}})$$

Dilate $\triangle DER$ if $D(-3,1)$, $E(-1,2)$, $R(2,-2)$ by a factor of 2, then reflect the image over the y -axis.

$$\begin{aligned}D'(&_, _) \\E'(&_, _) \\R'(&_, _) \\D''(&_, _) \\E''(&_, _) \\R''(&_, _)\end{aligned}$$

Reflect $\triangle DER$ if $D(-3,1)$, $E(-1,2)$, $R(2,-2)$ over the y -axis. Then dilate the image by a factor of 2.

Does the order matter when performing translations and reflections? Rotations and reflections? Dilations and reflections?

Without graphing, and just by applying rules to a single point, determine if order matters when combining:

Dilations and translations:

Rotations and Translations:

Dilations and Rotations:

What series of transformations made the following images?
