

IN YOUR NOTEBOOK, solve for x:

$$11) 14 = -(p - 8)$$

$$12) -(7 - 4x) = 9$$

$$13) -18 - 6k = 6(1 + 3k)$$

$$14) 5n + 34 = -2(1 - 7n)$$

$$15) 2(4x - 3) - 8 = 4 + 2x$$

$$16) 3n - 5 = -8(6 + 5n)$$

$$17) -(1 + 7x) - 6(-7 - x) = 36$$

$$18) -3(4x + 3) + 4(6x + 1) = 43$$

$$19) 24a - 23 = -5(1 - 6a)$$

$$20) -5(1 - 5x) + 5(-8x - 2) = -4x - 8x$$
