

SKILL 1: Reading and Writing Decimals

Each grid is separated into 100 sections of the same size, so each section represents one hundredth. The decimal shown is also written in a place-value chart, in number form, and in word form.

Place-value chart: -

Number form: 1.29

Word form: one and twenty-nine

hundredths

Example 1

Write the decimal shown at the right in number form and in word form.

The grid is divided into 10 sections of the same size, so each section represents one tenth. Five sections are shaded.

Number form: 0.5

Word form: five tenths

Example 2

Write four and three hundred eleven thousandths as a decimal.

The decimal point is read "and." A decimal in thousandths has three digits after the decimal point, so the decimal is 4.311.
